

Fitted with shock absorber pack and retractor units with protective covers. For workers up to 140kg in weight

RGL28

TWIN LEG SELF RETRACTING LANYARD

The RGL28 Chaser has been specifically designed to eliminate working hazards. It is fully retractable and must be used in conjunction with a fall arrest harness.

A twin leg self-retracting lanyard, the extra leg allows movement between anchorage points by means of double clipping. It has an almost instant lock off in the event of a fall, and recoils into the drum when slack is introduced into the lanyard. The reduced trip hazard and ultra-compact design make this unit ideal for tight work and tasks where a shorter arc of mobility is required. The RGL28 Chaser has a maximum working length of 2m. Suitable for MEWP operators.

The chaser is certified to EN 360:2002. Additionally, it also meets the dynamic requirement of EN 355:2002, which involves a 100kg mass dropped a distance of twice the length of the extended lanyard, and the peak force below 6kN.

Accredited to: EN 360:2002

Material: 15mm high strength UHMWPE

Fittings: 17mm steel twistlock karabiner with captive pin (RGK2P)
2 x 55mm Aluminium Super Light double action scaffold hook (RGK11/SL)

Max arrest force: <6kN

Weight: 2.15kg

Length(s): 0.8 - 2m (including connectors)

Shock Absorber

Self retracting units with protective covers
