

## RGA14

### GRABBER KERNMANTLE ROPE GRAB

The RGA14 is designed to provide vertical fall protection to operatives ascending/descending a ladder or structure, or to provide a work positioning/restraint solution.

The grabber is for use with kernmantle rope. It is also used in the rope access industry, as a protection device on the safety rope.

Accredited to: EN 353-2:2002 for rope 10.5-12mm  
EN 358:2018 for rope 10.5-12mm

Material: Aluminium

Weight: 172g

Max force: <6kN (with compatible rope e.g. RGRO11)

Safety lock

Detachable from rope
