

## RGK20

### 10MM SCREWGATE D LINK (10MM DIAMETER)

The RGK20 is normally used as a central connection link at the attachment point of the front of an adventure/climbing harness.

This provides a semi-permanent connection to the fall arrest equipment. This item also has many applications in the rope access and leisure industries.

The screwgate closure on this device means that the user must manually lock the RGK20 keeper after fitting.

Screwgate
