

RGL31

LADDER RESTRAINT LANYARD

This short lanyard has been specifically designed for ladder restraint when a shorter lanyard is required. The two attachments points can be used to adjust the length between yourself and the ladder when climbing.

The restraint lanyard can only be used for work restraint because there is no shock absorption built into the system. It should never be used to extend another fall arrest product.

We use 37kN polyester webbing to manufacture this product which helps give the product a longer life. It is also treated with a water repellent coating which also extends the life of this product.

Scaffold Hook

Accredited to: EN 354:2010

Web material: 26mm RIDGE Protect anti-bacterial polyester*

Fittings: 17mm steel screwgate karabiner (RGK1)
