

RGRO11

11MM KERNMANTLE ROPE

Used in conjunction with RGA rope grab devices, the RGRO11 provides vertical, or near vertical, fall protection. It is fitted with a single spliced eye with heat shrink cover.

This static rope is highly abrasion resistant, very low stretch, maximum strength, extremely durable and has a long service life. This rope is suitable for all kinds of rope access and work positioning. It can also be used for rescue work, guide work, expeditions and caving.
